Medical Association Program For Health Insurance Assailed

By FRANCIS M. LE MAY
Washington, Feb. 14 (AP) — The American Medical Association's substitute for President Truman's health insurance program was assailed by Rep. Dingell (D-Mich) today as "a plan to perpetuate pauperism of the sick and helpless."

"I consider the AMA proposal a cheap imitation of the real thing," he told reporters. Dingell is one of the authors of administration health legislation.

The AMA announced organized medicine's alternative plan in Chicago last night, proposing expansion of voluntary hospital and medical care plans instead of Federal Health Insurance. Some leaders in the medical profession have attacked the Truman administration plan as "socialized medicine."

Cost In Billions

Dingell said he thinks Mr. Truman's program has an "excellent chance" of passage in Congress. Some others were not so sure.

Republicans charted an all-out fight on the proposal for universal medical care insurance. Senator Taft (R-Ohio) proposed instead that the Federal government help states finance voluntary health insurance programs.

Dingell said today the president's new proposal is bound to call for compulsory insurance. Some administration sources said the program, to be financed by payroll taxes on employers and employees, would cost about \$6,000,000,000 a year when it gets going.

It would provide for government payment of all doctor, dentist and hospital bills, with the patient retaining free choice of his doctor, Dingell said.

More Space Needed For Firing Rockets

Bill Asks 200 Million For 3000-Mile Range

Washington, Feb. 14 (AP) — The United States will build guided missiles this year with ranges up to 500 miles. Scientists and military authorities confidently expect to push that range on up to 5,000 miles.

Witnesses, relating this before a House Armed Services Subcommittee today, urged that Congress authorize spending of \$200,000,000 to build a 3,000-mile range proving ground to test guided missiles.

General Muir S. Fairchild, Air Force vice chief of staff, told the subcommittee:

"Our program has proceeded to a point where a flight test range of far greater length than any now in existence is an absolute necessity. Missiles with ranges up to 500 miles will be ready for testing during 1949, without a range of sufficient length on which to fly them."

A guided missile is one whose flight path can be altered by a mechanism within the missile itself. Ordinary shells and bombs depend on the accuracy of the original aim.

Guided missiles are tracked now with radio and radar equipment that reads instruments inside the missiles.

Hungarian Minister In Washington Gets Threat, Asks Guards

Washington, Feb. 14 (AP) — A 24-hour police guard has been established outside the Hungarian legation as the result of a reported telephone threat against Hungarian Minister Andrew Sik.

Police officials said the request for the guard came from the state department. They did not reveal any details of the reported threat.

The uniformed police have been on duty since Wednesday. One patrolman is assigned to each of three eight-hour shifts.

Weather

Reported by U. S. Weather Bureau

UPPER MICHIGAN: Rising temperature with snow Tuesday and in the south and east portions tonight, a substantial amount near the Soo and mostly light elsewhere.

ESCANABA AND VICINITY: Light snow and warmer tonight, wind east to southeast 15 to 20 mph. Tuesday light snow and warmer, wind northwesterly 15 to 20 mph. High 36, low 25.

Church Must Resist Oppression, Says Pope

Moscow Squeeze To Absorb Puppet States Indicated

By EDWARD E. BOMAR

Washington, Feb. 14 (AP) — Eastern European assaults on churchmen have stirred American suspicions that Moscow may be getting ready to discard the "peoples democracy" system in Soviet satellites.

Philadelphia Groggy From Transit Tieup

Taxi Drivers Scheduled To Join Walkout

Philadelphia, Feb. 14 (AP) — Philadelphia, already groggy from the effects of a three-day-old Transit strike, waited today for another blow to fall—a taxi walkout scheduled for midnight.

No indication of a break in the Transit tie-up was apparent as officials of the Philadelphia Transportation company and the CIO-Transport Workers Union scheduled a meeting for 10:30 a.m. EST, today.

A similar session broke up last night with Andrew J. Kaelin, president of the union's Local 234, declaring "we are no closer together than when the strike started Monday."

Meanwhile, officials of the Yellow Cab Co. and Local 156, AFL-Taxicab Drivers Union called a last-minute meeting today in an effort to avert a walkout of the company's 3,850 drivers and mechanics at one minute after midnight.

Three hundred independent cab drivers voted at a meeting last night to join the Yellow walkout—an action that would leave the city's commuters with no transportation other than trains, improvised truck service and private automobiles.

The Transit Workers are seeking a 20 cent hourly wage increase. The company has offered three cents. The workers now average \$1.09 to \$1.63.

The Yellow Cab drivers are asking 50 per cent of gross receipts or a guaranteed \$1.20 an hour, rather than the present 45 per cent of receipts.

New Judge Starts Clean-Up Of Vice In Saginaw County

Saginaw, Mich., Feb. 14, (AP) — Circuit Judge Herman Dehne today was named one-man grand juror in a cleanup of Saginaw county.

He will arrive here Tuesday, fresh from his sensational cleanup of vice in Macomb county, where he has been one-man grand juror since 1946.

Judge Dehne will succeed Circuit Judge James E. O'Neill who has conducted a one-man investigation here since Oct. 28, 1947. O'Neill said the press of regular court routine made it impossible for him to continue as grand juror.

A few days ago, O'Neill directed a raid on an alleged disorderly house here.

Auto Workers Try To Get Out Of Cut At General Motors

Cleveland, Feb. 14 (AP) — A United Automobile Workers local of more than 2,500 members wants that CIO union's international executive board to back a cost-of-living pay cut. General motors is expected to make the cut March 1.

Local 45 of the Fisher Body plant here voted last night to ask renegotiation of last spring's contract. It provides GM can raise or lower wages as living costs rise or fall in the Bureau of Labor Statistics reports.

GM workers got a flat six-cent hourly raise and a five-cent cost-of-living raise last year. In May they are due for another flat raise of three cents which will not be affected by fluctuating living costs.

GUERRILLAS WIPE OUT

Athens, Feb. 14 (AP) — The Greek government said today its forces had killed 300 Communist guerrillas and captured 325 in a continuing battle for Phlorina strategic city near the juncture point of the Green, Albanian and Yugoslav frontiers.

Unjust Laws Attacked In Vatican Talk

Hungarian Government's Charges Called False

By FRANK O'BRIEN

Vatican City, Feb. 14 (AP) — Pope Pius XII declared that when a civil government contradicts Divine and human rights "bishops and the faithful themselves are bound by their conscience to resist unjust laws."

Addressing a secret and extraordinary consistory of the College of Cardinals of the Roman Catholic church on the case of Josef Cardinal Mindszenty, the pontiff asked prayers to the end that:

"... Those who rashly trample upon the liberty of the church and the rights of human conscience may at length understand that no civil society can endure when religion has been suppressed and God as it were, driven into exile."

Trial Story Twisted

The Pope said "our soul is crushed with most bitter grief" by the trial and condemnation of the Hungarian Primate.

In a brief speech to 16 cardinals closed with him in the consistorial hall of the Apostolic Palace, the pontiff declared the Hungarian Primate's trial had not been fairly tried.

"The principle object of the trial," the Pope said, "was to disrupt the Catholic church in Hungary and precisely for the purpose set forth in the Sacred Scripture:

"I shall strike the shepherd and the sheep of the flock shall be dispersed." (Mt. XXVI, 31).

The Pope declared Cardinal Mindszenty's physical condition during the trial was "inexplicable except as the result of secret influences which may not be publicly revealed; to prove this there is the fact that a man endowed with the full vigor of a powerful nature suddenly appears weak and mentally unbalanced."

Masses April 3

The pontiff branded "completely false" the Hungarian government's assertions that "the whole question at issue was that this Apostolic See in furtherance of plans for political domination of nations gave instructions to oppose the republic of Hungary and its rulers."

"We are doing," the pontiff told the 16 assembled princes of the Roman Catholic church, "what the outraged rights of the church and the dignity of the human person clearly demand."

This apparently was a reference to the excommunication of all

Retired Legislator Alf Osborn, 91, Dies At His Home In Soo

Sault Ste. Marie, Feb. 14, (AP) — Henry A. "Alf" Osborn, 91, retired Sault farmer and legislator, died today at his home here.

He served in the state legislature from 1920 until 1936 when he was defeated by Speaker of the House of Representatives Victor A. Knox. He was actively engaged in local politics for 41 years. Osborn farmed here for 49 years before retiring, clearing a 240-acre homestead from a forest four miles south of this city.

Iron River Miner Plunges To Death

Iron River, Mich., Feb. 14 (AP) — William Kirvala, 53, plunged 300 feet to his death in a shaft of the Pickands, Mather and Co. Davidson iron ore mine Sunday while installing an electric cable.

Governor And Wife Unhurt In Airplane Mishap At Lansing

Lansing, Mich., Feb. 14 (AP) — Governor G. Mennen Williams, his wife, Nancy, and seven other persons had a narrow escape last night when their C-47 National Guard plane skidded into a row of parked planes as it landed here.

The big plane, which went out of control as it hit an icy spot, skidded several hundred feet and came to rest less than 200 feet from a hangar.

A more serious accident was averted when two of the light planes became wedged under the C-47 on its erratic course and served to slow it down.

Governor Williams, who was returning from a winter sports carnival at Grayling, Mich., was shaken up as were the other plane occupants, but none required medical aid.

The pilot was Lieut. Col. Donald W. Armstrong of Detroit, commander of the Michigan Na-

tional Guard air wing.

The Governor and Mrs. Williams hurried to their Lansing home where they set up a lunch for their fellow passengers on the flight.

National Guard officers, who began an inquiry into the mishap, said that the two little planes that got wedged under the C-47 held the big ship upright and acted as a brake on its long skid. Two other small planes were brushed aside by the C-47.

They said that otherwise the governor's plane might have nosed over with serious consequences.

The undercarriage of the C-47 was considerably damaged and there was a deep dent on the bottom of the plane's nose.

The accident occurred as the big military plane was landing at Lansing airport with a 100-foot ceiling and visibility of three-quarters of a mile.

Republican Party Fighting People's Battle In Congress

By DOUGLAS B. CORNELL

Washington, Feb. 14 (AP) — Republicans have jumped to the political offensive with a campaign to sell the idea that they and not the Democrats are fighting the battle of the people in Congress.

Now they are preaching that the 80th Congress wasn't so bad after all, even though President Truman did maul it up and down the land throughout the last campaign.

Thus they have abandoned their own losing strategy of complicit campaigning and begun an uphill fight to regain control of Congress in 1950.

One of the key generals in the drive is House Minority Leader Martin of Massachusetts, the former speaker and former Republican national chairman. Martin has been saying for some time that the party could have won last November if it had put greater emphasis on what he considers major accomplishments of the 80th Congress, instead of confidently believing the election was in the bag.

And he has an idea that it still isn't too late to salvage that campaign plan and use it for the 1950 political wars.

Evidence that other leaders are inclined to go along came out over the weekend in a flood of oratory at Lincoln Day dinners and rallies.

Senator Wherry (R-Neb.) spoke up in Chicago, for instance:

"The Republican 80th Congress pulled our country out of a tailspin by sound, constructive actions. But we Republicans failed—miserably failed—to sell the accomplishments of the 80th Congress."

National Chairman Hugh Scott spoke in Bridgeport, Conn.:

"The American people realize it is the Republicans who are fighting their battles in the Congress."

Trial Story Twisted

The Pope said "our soul is crushed with most bitter grief" by the trial and condemnation of the Hungarian Primate.

In a brief speech to 16 cardinals closed with him in the consistorial hall of the Apostolic Palace, the pontiff declared the Hungarian Primate's trial had not been fairly tried.

"The principle object of the trial," the Pope said, "was to disrupt the Catholic church in Hungary and precisely for the purpose set forth in the Sacred Scripture:

"I shall strike the shepherd and the sheep of the flock shall be dispersed." (Mt. XXVI, 31).

The Pope declared Cardinal Mindszenty's physical condition during the trial was "inexplicable except as the result of secret influences which may not be publicly revealed; to prove this there is the fact that a man endowed with the full vigor of a powerful nature suddenly appears weak and mentally unbalanced."

Masses April 3

The pontiff branded "completely false" the Hungarian government's assertions that "the whole question at issue was that this Apostolic See in furtherance of plans for political domination of nations gave instructions to oppose the republic of Hungary and its rulers."

"We are doing," the pontiff told the 16 assembled princes of the Roman Catholic church, "what the outraged rights of the church and the dignity of the human person clearly demand."

Blizzards Add New Misery In Plains States

(By The Associated Press)

The misery dealing Great Plains blizzards had opened up a broad new front in North Dakota today with the worst 24 hours of weather the west has had in two weeks.

Six North Dakota counties were added to the disaster area as a result of weekend storms which stalled relief and rescue operations in some parts of Nebraska.

A minor tornado damaged a few buildings at Edna, in southeastern Kansas, and at Alvarado, Tex., strong winds lifted some residences from foundations and scattered them over a wide area.

There were no fatalities but damage at Alvarado was estimated at \$50,000.

Calumet Ice Cream Plant Gets Award At Dairy Meeting

The Wolverine Trophy for the Upper Peninsula dairy plant showing the greatest improvement during 1948 was awarded to the Bert Obenhoff ice cream plant of Calumet at the annual Upper Peninsula Dairy manufacturer's convention held in Marquette Friday and Saturday.

The award was presented Saturday at a dinner meeting in Marquette, by F. M. Skiver, chief of dairying for the educational and enforcement division of the Michigan department of agriculture.

The Wolverine Supply association, an affiliate of the U. P. Dairy Manufacturer's association, met in Marquette on Friday and Saturday. W. J. Hanson of Duluth was elected president, George D. Smith of Evanston, Ill., vice president; and Ben Wood of Minneapolis secretary-treasurer.

Don F. Kellogg of Burlington, Wis., was elected chairman of the supply association entertainment committee and Edward J. DuQuaine of Green Bay and Frank Scheu of Chicago, his assistants.

A highlight of the convention meeting Saturday was a round table discussion of the dairy industry with F. M. Skiver as chairman. On the panel were William Lutz, dairy specialist from the experimental station at Chatsworth; G. S. MacIntyre, assistant commissioner of the state department of agriculture; and Don Murray, dairy specialist of Michigan State College in East Lansing.

Escanaba was awarded next year's convention of the Upper Peninsula Dairy Manufacturers association.

William Plansky of Escanaba was elected president of the U. P. Dairy Manufacturer's association; O. C. D'Amour of Gladstone, secretary-treasurer, and Walter Nelson of Manistique, vice president, at elections held Saturday morning. Members of the board of directors were also elected.

Among those attending the convention from this area were Mr. and Mrs. William Plansky, Mr. and Mrs. O'Neil D'Amour of Gladstone, Rudy Anderson, Jerome Cayen, Henry Bathke, John Birkenmeier, William Kasbohm and Nick Devilly.

Hospital

Mrs. Ignatius Madalinski of La-Branche was admitted Sunday to St. Francis hospital for treatment.

Barn owls for years have inhabited the northwest tower of the Smithsonian Institution in Washington, D. C.

Frank DeVet Takes Life In Grief Over Death Of Grandson

III for the past three years and deeply despondent since the tragic drowning in Big Bay de Noc of Leslie DeVet Jr., 19, his grandson, Frank DeVet, 72, of Fairport, Sunday morning took his own life in the kitchen of the DeVet home while other members of the family were at church.

Dolph Ayotte, 65, Dies Sunday Night, III for Six Years

Dolph Ayotte, 65, died at his home, 1312 Ludington street, at 10:15 Sunday night. He had been ill for the past six years suffering from cancer and heart ailment.

He was born in St. Augustine, Canada, June 20, 1883, and came to this country with his parents who settled in Ishpeming when he was 7 years old. He spent all of his life in this part of the Upper Peninsula, living in Gladstone for some time, and moving to Escanaba 18 years ago. He was a painter and decorator.

Surviving are his wife, the former Martha Clarke, one son, Wilfred, of Gladstone, two grandchildren and four brothers and one sister in Canada.

Funeral services will be held at the Allo funeral home at 10 o'clock Thursday morning with Rev. Clifford Nadeau officiating, and burial will be in Lakeview cemetery. Friends of the family may call at the funeral home beginning at 2 o'clock Wednesday afternoon.

Donald Baum Wins Chicago Art Award

Donald Baum, 27, son of Mr. and Mrs. Abe Baum of 408 South 11th street, has been awarded the \$100 Joseph N. Eisendrath prize for his print, "The Window," currently on exhibit in the Chicago Art Institute's 53rd annual exhibition.

Baum, a graduate of EHS, attended Michigan State college and received his degree as a master of arts from the University of Chicago. For the past year he has been teaching art in Roosevelt college in Chicago.

"Don has received honorable mention in several art shows since he began painting while at Michigan State, but this is the first time he has won a cash award," Mrs. Baum said this morning.

Baum, a graduate of EHS, attended Michigan State college and received his degree as a master of arts from the University of Chicago. For the past year he has been teaching art in Roosevelt college in Chicago.

There will be no primary election in Maple Ridge township due to no opposition on any ticket. The name of Clarence Larson, Board of Review on township ticket, was erroneously omitted in list of candidates.

The aged man grieved following the death of the youth, only child of Mr. and Mrs. Leslie DeVet Jr., 19, his grandson, Frank DeVet, 72, of Fairport. The young man drowned Feb. 7, one week ago today, when the jeep in which he was riding with his father and uncle broke through the ice two miles south of Round Island in Big Bay de Noc. The body was recovered the following day from 40 feet of water.

State police of Manistique who investigated the death of the aged man reported he had shot himself in the chest with a 12 gauge shotgun loaded with buckshot. His body was discovered at 9:30 o'clock by members of the family when they returned from church.

Mr. DeVet was born in Fayette October 30, 1876 and was a lifelong resident of Fayette and Fairport. He devoted his entire life to commercial fishing, retiring in 1945 because of ill health. He was an ardent sportsman, spending his leisure time in hunting and game fishing, and on these trips the grandson who was drowned was his constant companion, and often was called "grandfather's shadow."

He was a member of St. Peter's church.

Funeral Wednesday

Surviving are his widow, the former Anna Mae Casey, and three sons and two daughters, Francis of Lansing, Leslie and Myron of Fairport; Miss Frieda of Oak Park, Ill.; and Mrs. Frank (Imogene) Burger, St. Charles, Ill.; 5 grandchildren; and the following brothers and sisters: Mrs. Mary Spielmacher and Mrs. Joseph Miller, Manistique; Harry, Louis and Leon, Fayette; Charles, Seattle, Wash.; and Miss Nettie DeVet of Gladstone.

The body will be in state at the Allo funeral home at 7 o'clock this evening and the rosary will be recited at 8 o'clock, led by Rev. Arnold Thompson. Tuesday afternoon the body will be taken to the Leslie DeVet home. Services will be held at a solemn requiem high mass Wednesday morning at 10 o'clock at St. John's church in Garden and burial will be in New Garden cemetery.

The first school for children of pre-school age was founded by Jean Frederic Oberlin in 1774 in Waldbach.

Briefly Told

Scout Meeting — Troop 407 of Wells will meet tonight at 7 p.m. in the Wells clubhouse and hold open house for all boys 12 or over interested in becoming Boy Scouts. Parents of Scouts are invited. Edmond Kot, Scout executive of the Red Buck council, will take part in the meeting. Troop 407 is a member of Shepeck Dimension company.

Phone Techniques — City employees will view a motion picture depicting telephone techniques at the city hall council chambers this afternoon at 4:30 o'clock.

History Society — The Delta County Historical Society will hold its February meeting in the upstairs music room of the Gladstone High school library, it was announced today by Frank Bender Jr., president. The program will be presented by members of the Gladstone community.

Canceled Meeting — A special meeting of Delta Chapter 113, R. A. M., scheduled for Wednesday evening, has been canceled.

JCC Meeting — The regular monthly meeting of the Escanaba Junior Chamber of Commerce will be held beginning at 7:30 Tuesday evening in the House of Ludington. Wives and guests of Jaycees are invited.

Odd Fellows Meeting — Impellent Lodge No. 460, I. O. O. F., will hold a regular meeting this evening at the Odd Fellows Hall, North 10th street, beginning at 8 o'clock. Beginning at about 8:30, immediately following the regular meeting, there will be a showing of the movie, "Highlights of the 1948 Baseball World Series". Friends and potential candidates are invited.

Rifle Club — The Escanaba Rifle and Pistol club will hold another practice session at 7:30 Tuesday evening on the indoor range at the State Fair exhibition building.

Alligator Killed — A pet alligator was killed at Wickert's Greenhouse, 2323 Ludington street, Sunday afternoon and some plants also were broken, apparently by youngsters who broke into the building.

The installation probably will be completed this week, after which it is planned to proceed with the installation of new mercury arc vapor lamps on Ludington street.

The first school for children of pre-school age was founded by Jean Frederic Oberlin in 1774 in Waldbach.

Escanaba Merchants Hold Dollar Days Tuesday And Wednesday

STORES OFFER BIG BARGAINS

Prices Are Certified By Shoppers Group

Tuesday and Wednesday will be Dollar Days in Escanaba.

Determined to make this the greatest bargain festival in years, Escanaba merchants have slashed prices on merchandise as never before, according to the retailers committee of the Escanaba Chamber of Commerce, which is sponsoring the community sales event.

"Shop in Escanaba where automobile parking is free," is the slogan adopted for this year's Dollar Days project.

More important, however, are the merchandise values that are being offered to shoppers, the retailers committee points out.

To convince the public that radical price reductions have been put into effect, the Escanaba Chamber of Commerce appointed a woman's certifying committee. This representative group of women shoppers checked all the merchandise to be advertised in the Escanaba Daily Press and advised the merchants concerning the prices that should be charged to make the bargains really attractive to buyers. A picture of the committee appears elsewhere in this edition of the Press.

Escanaba stores will be open during the regular hours for the Dollar Days sales.

Butler to Address Cloverland College Students Feb. 16

The Student Council of Cloverland Commercial college will hear Stahl Butler of Lansing as guest speaker on Wednesday, Feb. 16, at the college.

Butler has appeared for five years on the program of service, church, school, and community groups with his amusing, educational, and unique lecture, "The Language of the Silent World," which provides a thorough understanding of the problems of the adjustment of the acoustically disabled.

He has had 25 years experience working with the deaf and hard of hearing in five states and the District of Columbia. He was for five years principal at the Michigan School for the Deaf in Flint and is now supervisor for the deaf and hard of hearing with the Office of Vocational Rehabilitation, Department of Public Instruction.

There will be an opportunity for questions and conferences with Butler following the lecture.

There are more than 19,000 auto to tourist "motels" in the United States.

Three Die In Fire As Mothers Make Valentine Cookies

Minneapolis, Feb. 14 (AP)—Three children burned to death in a city-owned quonset hut while their mothers were busy next door making cookies for a Valentine party today.

The dead were Wayne 4, and Thomas Robinson, 3, children of Mr. and Mrs. Arthur Robinson, and Darnith Magneson, 5, daughter of Mr. and Mrs. Arthur Magneson, occupants of an adjacent hut.

The three children were playing in the Robinson quarters Sunday while their mothers baked Valentine cookies in the adjacent hut apartment next door.

Firemen said a hole in the floor indicated the children might have been playing with something that caused the fire.

Former Legislators And Lobbyist To Be Released On Parole

Lansing, Feb. 14 (AP)—The state parole board today ordered the parole of two former legislators and a veteran lobbyist who are serving sentences for bribery conspiracy.

Those paroled are former Senators Jerry T. Logie of Bay City and Carl F. Delano of Kalamazoo and Floyd Fitzsimmons, Benton Harbor lobbyist and sports promoter.

A Ross Pascoe, parole board member, said the trio was being released ahead of the normal parole time because of their poor health and with the approval of Circuit Judge John Simpson of Jackson who sentenced them.

Logie was sentenced to serve three to five years for accepting a bribe to influence his vote on a bill regulating horse racing and pari-mutuel betting and on an intangible tax law in 1941.

Delano was sentenced to the same term for accepting a bribe in a bill regulating the practice of naturopathy in 1939.

Dealers saw the relative strength in soybeans and lard as primarily a technical advance as these commodities have been about the weakest in the last several weeks. Lard was less active than in last week's hectic markets.

With the exception of the December delivery, which opened lower, corn had considerable strength at the start.

Gains ranged to nearly two cents. The December contract represents the 1949 crop.

Dealers saw the relative strength in soybeans and lard as primarily a technical advance as these commodities have been about the weakest in the last several weeks. Lard was less active than in last week's hectic markets.

Wheat near the end of the first hour was 3/4 cent lower to 1 1/4 higher, May \$2.12 1/4; corn was 1/4 lower to 1 1/8 higher; May \$1.25 1/2, and oats were 1/4 lower to 3/8 higher, May 60 3/4. Soybeans, 13 1/2 to 2 1/8 cents higher, March \$2.20 7-8; and lard was 10 to 13 cents a hundred pounds higher, March \$1.30.

CHICAGO LIVESTOCK

Chicago, Feb. 14 (AP)—Trends in grains were confused on the Board of Trade today but soybeans and lard showed some strength. In all pits dealings were less active than in last week's hectic markets.

With the exception of the December delivery, which opened lower, corn had considerable strength at the start.

Gains ranged to nearly two cents. The December contract represents the 1949 crop.

Nation Needs

Sen. Vandenberg

SENATOR VANDENBERG'S decision to retire at the completion of his present term in 1952 is an extremely regrettable one. It means that the country will lose the services and talents of the man who more than any other in public life can lead the nation on the path of a solid foreign policy at a time when solidarity is absolutely essential in our dealings with other nations.

Senator Vandenberg's decision to retire undoubtedly is made in greatest sincerity and in a modest belief that others can carry on equally well the work that he is doing. However, unless the status of world peace is improved considerably in the next three years, the loss of Mr. Vandenberg's statesmanship will be very keenly felt.

The Michigan senior senator has shown on many occasions that he places his country's welfare above that of his own party or of himself. If the international situation remains as clouded as it is today when the time comes for Senator Vandenberg to retire, it may be possible to persuade him to continue the great work that he is doing.

In his Lincoln Day address in Detroit, Senator Vandenberg emphasized the continued need for a bi-partisan foreign policy and in a modest belief that others can carry on equally well the work that he is doing. However, unless the status of world peace is improved considerably in the next three years, the loss of Mr. Vandenberg's statesmanship will be very keenly felt.

"You wouldn't be here tonight just as a character builder," said Mr. Veeck. "You have to win to be invited to banquets."

We are inclined to agree with the Indians' head man. We feel safe in saying that few if any lives have been blighted by youthful disillusionment caused by the extracurricular behavior of professional athletes.

The late Babe Ruth was one of the greatest idols that sport has produced. He was a remarkable compound of strength, co-ordination, instinctive baseball sense and colorful personality.

But throughout his playing career, the Babe had a reputation of being a bad boy off the field—not evil or criminal, but irresponsible to a degree far beyond the limits of Sunday School standards. So far as we know, this did not diminish his stature as a public hero.

All this may not be too important, but it is a little unfair to the athletes. It's enough of a strain on the average pro's mentality to keep well enough in shape to play his best, please the boss and the fans, and justify his handsome salary. He should not be saddled with the added job of crusading against juvenile delinquency—an assignment which understandably he might not even comprehend.

So far as we can learn, most delinquency arises from a child's home environment and treatment, not from his reaction to the off-limits escapades of ball players. Also discussed have been how long these properties should remain under Russian control, and how much of their current production should be assigned Russia.

A further question arises over whether these properties finally transferred should be subject to the laws of the Austrian government, and whether they should be exempted from possible nationalization by the Austrians after a term of years.

HOW TO GUARANTEE FREEDOM

Among lesser treaty articles on which there is disagreement is one proposing that the Big Four guarantee to recognize the independence and territorial integrity of Austria, and what machinery might be set up to prevent aggression against Austria by other powers. Soviet delegates have in the past opposed this idea, saying that such questions should be handled by the United Nations.

There has been no agreement on whether Austria should be barred from research manufacture or stockpiling of materials that might contribute to a military potential. The United States and Britain have been against any such restrictions.

Treatment of 400,000 to 500,000 displaced persons in Austria provides another tough question. Most of the DP's are now in the three western zones. The western powers are opposed to any repatriation or resettlement against the will of the DP's themselves.

Treatment of property in Austria belonging to citizens of other United Nations countries may take a long time to work out.

Efforts to draft the Austrian peace treaty were begun in London in January and February, 1947.

U. S. Minister Samuel Reber has been the American deputy since last February. He will preside at the new negotiations, which have been resumed as the result of requests by the Austrian government last December.

The man who built a two-car garage a few years back certainly was foresighted. He keeps the car in one side and lives in the other.

In the old days Indians prized corn for its color rather than its taste. In the modern day the white man goes by the kick.

A Kansas woman is taking her first vacation in 90 years. Maybe that's why she lived to be 90.

A large family on a man's hands is certain to keep them busy.

You can't be polite these days without somebody wondering what you want.

ABOUT MIRAGE WORDS

A number of familiar and useful words are commonly mispronounced because they seem to be reflections of other similar but quite unrelated words. This reflection is like a mirage. When you approach it for examination, it simply fades away before your eyes.

Column is a mirage of volume; hence the mispronunciation "KOL-yum." Correct: KOL-um.

Danish is a mirage of vanish; hence the mispronunciation "DAN-ish." Correct: DAY-nish.

Egret is a mirage of regret; hence the mispronunciation "ee-GRET." Correct: EE-GET.

Flaccid is a mirage of placid; hence the mispronunciation "FLASS-id." Correct: FLAKS-id.

Grievous is a mirage of precious; hence the mispronunciation "GREE-vee-uss." Correct: GREE-vuss.

Hearth is a mirage of earth; hence the mispronunciation "hurth." Correct: hahrt.

Impudent is a mirage of imprudent; hence the mispronunciation "im-PEW-dnt." Correct: IM-pew-dnt.

Attacked is a mirage of attracted; hence

The correct use of shall-will, should

Russ Sincerity Will Be Tested

BY PETER EDSON

Washington. (NEA)—New attempts by deputies of the Big Four Council of Foreign Ministers to draft an Austrian peace treaty should throw considerable light on the sincerity of Russia's peace offensive.

This will be the sixth try since the end of the war. The first five have produced tentative drafts on a 57-article treaty, which is still a secret document. There has been agreement on 35 articles by all four powers—the United States, Britain, France and Russia. On the other 18 articles there is disagreement, although some paragraphs and brackets in these articles have been agreed to.

The treaty is stalled on two principal issues. 1. Should Austria have the same boundaries as in 1937, before the Hitler take over? This is article five of the proposed treaty. 2. What German-owned assets in the East Austria occupation zone should be given to Russia as reparations from Germany? This is article 35.

Treaty negotiations broke down last May over the boundary question. It is not now considered so important, except that the Russians might want to cling to it as a pretext, in case they do not wish to agree on the larger question of reparations.

ONLY ONE BOUNDARY QUESTION

There is really only one territorial or boundary question. It is southern Carinthia, which has been claimed by Yugoslavia. In the past this claim has been supported by the Russians. Whether the split between the Russian Cominform bloc and Marshal Tito's Yugoslavia has changed the Russian attitude will be worth watching.

Another Yugoslav claim against Austria is for \$150,000,000 reparations. In the Potsdam agreement of August, 1945, the Big Four said that Austria should pay no reparations. Later the Russians claimed this meant only reparations for the Big Four. The U. S., Britain and France say it applies to all countries. The Russians have supported the Yugoslav claim, but again may change.

On the larger question of reparations for Russia proper, the Potsdam agreement gave Russia German-owned assets in its East Austrian occupation zone. But the trouble from the very first negotiations has been in defining what constitutes German-owned assets.

Several attempts have been made to approach this problem from new angles in reaching a compromise solution. One has been to specify properties in East Austria which might be assigned to Russia as reparations. Another has been to fix a lump sum for payment to the Russians in lieu of property reparations.

Among specific items considered are oil properties, Danube Steamship Co. assets, farm lands and factories. Also discussed have been how long these properties should remain under Russian control, and how much of their current production should be assigned Russia.

A further question arises over whether these properties finally transferred should be subject to the laws of the Austrian government, and whether they should be exempted from possible nationalization by the Austrians after a term of years.

HOW TO GUARANTEE FREEDOM

"Sold! To the Miracle Man From Missouri!"

INTO THE PAST

Ten Years Ago

Munising—Miss Ann Raica was named Munising's winter queen at the closing of the contest here Saturday. Miss Betty Richards placed second in the final tabulations.

Escanaba—Cadet Ivan Satten of Escanaba, student of West Point Military academy, has been awarded his academy monogram in football, it has been announced by the superintendent.

Manistique—Mr. and Mrs. Bert Heric of Ontonagon are the parents of a daughter born Feb. 7. The baby has been named Karen Louise.

Manistique—Miss Helen Cayia of Chicago has arrived to spend two weeks at her home here.

Twenty Years Ago

Hermansville—The farm home of Eli Robertson was destroyed Feb. 12 by fire which started from chimney sparks. Damage is estimated at \$15,000.

Gladstone—Arthur Lillie who is employed in Wausau, Wis., arrived today to spend two weeks with his parents, Mr. and Mrs. P. S. Lillie.

Manistique—Miss Ada Mueller has returned to her nursing duties in Chicago following a three week visit here with her parents, Mr. and Mrs. William Miller.

Escanaba—R. R. Finley, yardmaster for the Chicago and Northwestern was elected chairman of the Chicago and Northwestern Booster club at a meeting held in the city hall this week. He succeeds George Fish.

Twenty Years Ago

Any man 50 years of age who thinks he's a devil with the women is a fool.—Dr. Thurman B. Rice, Indiana University medical school.

We must keep America strong and the world at peace, but do that with the idea that the taxpayer also must survive.—Sen. Millard Tydings (D) of Maryland.

for a dog. Then we don't envy the mailman his job.

SEVEN YEARS AGO—Seven years ago in Johnson City, Tenn., a letter was mailed to Mrs. Roy D. Dempsey, then a resident of Kingsport, Tenn. The letter was dated Dec. 12, 1942.

Mrs. Dempsey received that letter just a few days ago at 808 South 13th street, Escanaba. Mr. Dempsey is employed by the Escanaba Paper company. They moved here from the South a couple years ago.

Successor To Wells Well Known In U. P.

Russell E. Horwood, named to succeed the late J. G. Wells, Jr., to head the Michigan State college Extension and Research program in the Upper Peninsula, is no newcomer to that area.

He spent ten years as dairy and livestock specialist in the Upper Peninsula from 1927 to 1938. Starting April 1 he will leave his teaching duties in the dairy department at Michigan State College and take up the work as supervisor of the Upper Peninsula for the Extension Service and superintendent of the Chatham Experiment Station.

The appointment was approved February 10 by the state board of agriculture, governing body for Michigan State college. Dean E. L. Anthony of the school of agriculture said Horwood's duties would be the same as those of the late Mr. Wells.

Horwood, a native of Howell, graduated from Michigan State college in 1926 and went to the Upper Peninsula in 1927 as Extension dairyman. He was there until January of 1938, except for a brief time he spent earning his master of science degree in dairy husbandry at Michigan State college.

He returned to East Lansing in 1938 and has taught in the dairy department since that time except for a year during which he was a civilian employee during the occupation of Japan. There he was assigned the job of studying Japan's agricultural program and setting up a democratic Extension program similar to that operating in the United States. He returned in the fall of 1947 and the program he outlined is now being put into use by occupation forces.

Mr. and Mrs. Horwood have three boys, Robert, a freshman at MSC; Richard and William, both sophomores in East Lansing high school.

The Horwoods will live at the Experiment Station at Chatham.

Five Attend Eagles Meeting in Negaunee

Five Escanabans attended a monthly district meeting of the Eagles in Negaunee presided by Werner A. Olson, of Escanaba, district chairman.

Besides Olson, others attending were Leslie Varino, Alvin O'Donnell, William Ettenhofer and Kenneth Lucas. Negaunee and Marquette members also attended.

After a business meeting, members of the host Aerie served a smorgasbord lunch.

Fish are growing twice as fast as normally in an enclosed saltwater sea in the west of Scotland. The sea is being fertilized with sodium nitrate and phosphates to increase the growth of the small plants along the ocean bed, on which the fish feed.

Eighty per cent of the tornadoes in the United States occur between noon and six p. m.

Four-fifths of U. S. farm houses were without modern bath rooms in April, 1947.

R. E. HORWOOD

CARMEL, CAL., IS FEMININE

Resort Community Has Top Female Ratio

Washington.—Contrary to popular opinion, Washington is not the most feminine city in the United States.

In big cities, the sex ratio—the number of men in proportion to the number of women—is neither extremely high or extremely low.

This is the finding of Dr Joseph H. Greenberg, of the University of Colorado, who made a study of the size and sex ratio of all United States cities at the time of the 1940 census and who reports his results in a forthcoming issue of the American Sociological Review.

The most feminine city is Carmel-by-the-Sea, Calif. And it is the only city in which there are as few as seven men to each 10 women. It is just because it is a small city (less than 5,000 inhabitants) that it is so attractive to women, Dr. Greenberg believes. It would not be so specifically a resort town and artists' colony if it were larger.

It is also size that gives the most male city in the country its extremely high sex ratio. Dan-

nemora, N. Y., has a sex ratio of 577.4 males to each 100 women—a proportion of nearly 58 men to each 10 women. It has this high sex ratio because the prison located there outbalances the population of the city.

Trenary

Mrs. Jenny Heraver returned Monday to Waukegan, Ill., after spending the weekend with her parents, Mr. and Mrs. Paul Kallio.

NICKELL WILL TALK THURSDAY

Wildlife Lecturer Will Show Movies

Walter P. Nickell, research ornithologist of the Cranbrook Institute of Science at Bloomfield Hills, Mich., will speak in the junior high school auditorium on Thursday, Feb. 17, at 8 o'clock and will show colored movies. Mr. Nickell's lecture will be the fourth in the Hiawatha Wildlife series, sponsored jointly by the Extension Service of the University of Michigan and the Extension Division of the Wolverine Conservation club.

The title of the movie is "Wild Friends at Home." Fifteen species of spring, summer and fall wildflowers will be shown in brilliant close-up shots. More than a dozen birds are included in the study; mammals such as the raccoon, opossum, and jumping mouse; insects, with particular emphasis on moths and butterflies; and reptiles and amphibians, in which group are seen toads, turtles, salamanders, and snakes.

The movie was planned for both adults and children. Of special interest to boys and girls are sequences on Scouts and their dads, building fires and cooking out in the snow, canoeing and camping on the Pigeon and Manistee Rivers, and studying mammal, bird, insect, reptile and amphibian life in several Michigan localities. They will also enjoy the raccoon and jumping mouse sequences.

Mr. Nickell is one of Michigan's leaders in popularizing natural history. He has served as president of the Detroit Audubon Club, organizer of Detroit hiking clubs, naturalist at numerous summer camps, including the Audubon Nature Center at Greenwich, Conn., and is now president of the Michigan Association for Native Plant Protection.

People who do not hold tickets for the entire Wildlife series may purchase single-admission tickets at the door of the auditorium on the evening of the lecture.

Mrs. Ida Lindstrom Dies In Menominee

Mrs. Ida Lindstrom, 70, of 1126 Holmes avenue, Menominee, a resident of that city for many years, died Friday in St. Joseph's hospital after a long illness.

Mrs. Lindstrom leaves five sons, a niece, Miss Belle Cass, of this city, and several nephews, including Charles, Robert, William and George Cass.

Services were held Sunday afternoon at the Presbyterian church in Menominee and burial was made there.

St. Nicholas

St. Nicholas, Mich.—Nick VanAcher left last Friday morning for Miami Beach, Fla., to visit friends.

Miss Mary Theresa Jodoc returned to Marquette where she attends Northern Michigan College of Education last Sunday after spending a week here with her parents, Mr. and Mrs. Peter Jodoc.

Uranium Hunt May Rival 1849 Boom

Ann Arbor, Mich., (P)—A uranium rush in the 1950's may make a piker out of the historic gold rush of 1849, in the opinion of a University of Michigan professor.

But instead of the "tap, tap, tapping" of the gold prospectors pick, the new rush may be characterized by click-click-click of the Geiger counter.

The results, however, probably will be the same: Disappointment for many, success and riches for a few, according to Prof. E. William Heinrich, mineralogy specialist at the university.

Even now, there's a host of prospectors roaming the "likely" areas of the country in search of the modern counterpart of the yellow gold—the bonanza that made virtual paupers into millionaires overnight.

While not denying that some new strike is always possible, Prof. Heinrich points out to any who have the urge to "take off" that most of the "geologically favorable" land was investigated by the government after the outbreak of World War II.

The department of the interior, he claims, has put up "not for sale" signs on any lands known to contain fissionable materials. This was made easy because earlier searches had been made for pitch-blende, which usually is found in combination with uranium.

"Areas that are geologically favorable for uranium deposits," Heinrich says, "are the Colorado-Utah district and what is known as the Canadian shield."

The latter area, he explains, is a huge rock formation that sweeps down from the barren north of Canada, through Ontario and up through Quebec and Labrador. It forms a gigantic horseshoe about Hudson Bay with the prongs pointed northward. The "head"

When word of this gets out, he predicts, a madness to rival the insanity bred of gold will sweep the nation, and the "uranium rush of the '50's" may be on.

The possibility of preventing lightning-caused forest fires by eliminating lightning itself is suggested by a weather scientist.

The scheme includes the transformation of towering cumulus clouds in the area to snow by the use of dry ice.

FARM INCOME IN DELTA CO.

Was Higher In '48 Than
During 1947

Washington, D. C., (WNS)—While officials of the American Farm Bureau Federation are questioning the effect on agriculture of a bill to increase minimum wages from 40 to 75 cents per hour, the U. S. Department of Agriculture has reported that farm wage rates in Michigan average 86 cents per hour.

USDA also reported that average monthly wage rates of farm workers in Michigan increased nearly five per cent during 1948 from \$122 on January 1, 1948 to \$128 on the first day of 1949.

The bill, now being considered by the House Labor Committee increases the existing 40-cent minimum wage to 75 cents an hour and leaves the way open for an increase to one dollar per hour on recommendations of industry committees.

The American Farm Bureau Federation has urged that the basic minimum hourly wage in the low be adjustable to the rise or fall in the cost of living and that the Farm Bureau favors a higher minimum wage when conditions warrant it and an adjustment downward should be made when the cost of living declines.

Meanwhile U. S. Department of Agriculture officials are expressing alarm over possible declines in farm income. This decline is not evident in Delta County, where latest estimates show farm income for the first eleven months of 1948 amounted to \$2,661,000, an increase over the \$2,610,000 total for the comparable period in 1947.

The average hourly farm wage rate in Michigan of 86 cents is an increase over the 82 cents a year ago, USDA reported.

DOLLAR DAY BARGAINS CERTIFIED —

Here are some of the members of the women shoppers' certifying committee engaged in analyzing the merchandise to be offered for sale as special bargains during the Dollar Days sales in Escanaba on Tuesday and Wednesday. The women were selected by the retailers committee of the Escanaba Chamber of Commerce and were requested to give their frank opinion about

the merchandise. In the picture are Mrs. John Anthony, Mrs. Nels Jensen, Mrs. Carl Nelson, Miss Drusilla Shaw, Mrs. Alfred Brandt and Mrs. Arthur Bolm. The C. of C retailers committee issues an invitation in advertisements appearing in today's press to Upper Peninsula shoppers to come to "shop in Escanaba where automobile parking is free."

Munising News

Moose Lodge Will Meet On Thursday

Munising — Members of the Moose lodge will meet Thursday night in the Moose hall to draw up plans for the annual Upper Peninsula Moose convention which will be held here next summer. Committees to arrange details of the program will be appointed.

Orville Revord Runs For Office

Munising — A second candidate has flung his hat into the campaign for city commissioner of public works and utilities. He is Orville Revord, Island View Addition. George Putvin announced his candidacy last week.

MUNISING BRIEFS

A meeting of the WOOF will be held Tuesday night in the KC hall.

The Home Economics club and Tri-Hi-Y club of Mather high school will give their annual hop Saturday, Feb. 26, in Mather gymnasium.

Mr. and Mrs. Fred J. C. Williams have returned to Lansing after spending a few days here with friends.

CHRISTMAS FUND

Munising — Contributions to Munising's community Christmas program, held last Dec. 23, totaled \$355 and expenses were \$82.36. Jeff Bodette, Chamber of Commerce secretary, has reported. The \$72.64 balance will go toward another program next Christmas.

tend baseball training camps of Roger Hornsby.

Chatham

Bridge Club

Chatham, Mich.—Mrs. Arthur Wolcott entertained the bridge club at her home Thursday evening, Feb. 10. Two tables were in play. First prize was won by Mrs. John Hicks and consolation prize by Mrs. Henry Endahl. Guests were Mrs. Vincent Trudeau, Mrs. Henry Endahl, Forest Lake; Mrs. John Hicks, Trenary; Miss Ann Largura and Miss Belle Green, Chatham.

PERSONALS

Mr. and Mrs. Ray Hutter of Marquette visited Mr. and Mrs. George Levlis Wednesday. Mr. Hutter will replace Mr. Levlis at the L. S. & I. railroad office here during the next two weeks. Mr. and Mrs. Levlis will leave Tuesday for Rochester clinic where Mr. Levlis will have an ear surgery check-up at the Mayo clinic. They will visit in Madison, Milwaukee, Minneapolis and Superior on the return trip.

Bark River P-T-A Presents Program

Bark River, Mich.—The Bark River Parent-Teacher association met Thursday, Feb. 10, at Bark River high school. The program was centered around Founders' Day, celebrating the 52nd year of the P. T. A. The Bark River P. T. A. is 22 years old. It was organized on Nov. 3, 1926.

At the beginning of the meeting, Mrs. Al Johnson welcomed members and guests. A short business meeting was held, after which the following program, with Mrs. Chester Good, chairman, announcing, was presented:

"America the Beautiful"—Group Message from Founders' Day chairman—Mrs. William Kletzer—Mrs. Chester Good.

History of Bark River P. T. A.—Mrs. Russell Simmons, Mrs. Dan Levesque and Mrs. Bill LaVigne. A few of the past presidents added details of events which had taken place during their administration.

Piano Reverie, "Love Dream"—LeRoy Johnson

Roll call of past presidents—Mrs. Al Johnson. Out of 17 past presidents, eleven were present at the meeting.

"A Skating Song" — Harris Glee club under the direction of Richard Luecke.

Selections—Harris high school band.

Following the program, the penny march was held, the members contributing to the student loan fund. The group marched, accompanied by Richard Luecke, around a table, decorated with a three tiered cake, trimmed in blue and gold. The cake was balanced by blue and gold candles, which were set in crystal candleholders.

A social hour was held after the program and lunch was served. Hostesses for the evening were Mesdames William LaVigne, Al Johnson, William Peltier, Walter Palke, Mike Slaga and Leo Gatien.

Toboggan Party

A toboggan party sponsored by the Bark River Lions club, Thursday night near the Bark River high school was well attended. All pupils are welcome to attend these gatherings which take place every other Thursday.

The children enjoyed a lunch after the party held in the school basement.

A new kind of dry battery that is lighter and longer lasting because it uses oxygen from the air, instead of from chemicals within it, has been announced. People who wear electronic hearing aids will be the first to benefit from this development.

The smallest swifts, swiftlets, produce the edible birds' nests, prized among the Chinese for making soup.

Mrs. Lucy Purtill, daughter Mildred and Mrs. Joe Farley visited Mrs. Walter Whitman of Manistique Tuesday.

Perry Pardee, son of Mr. and Mrs. John Pardee, returned from Marquette Wednesday.

Mr. and Mrs. Don Farley and Mrs. Jane Miller of Boyne City arrived here Thursday called by the death of Mr. Farley's nephew, Leslie Devet.

Freak Weather Costs Industry Many Millions

New York, (AP)—Blow hot blow cold, this winter's freak weather has cost industry many millions. It also has cost—and this can't be put in dollars—many lives and untold human want and misery.

Mild, open weather in the northeastern quarter of the nation has taken a heavy toll in lost sales dollars. Blustery cold in the western half of the country has drained away millions more in damaged facilities, frozen livestock, ruined crops and paralyzed flow of trade.

It's the sadder because it can't be blamed on politicians, or even the law of supply and demand. Everyone has his pet theory as to the cause of bad weather. Businesses know its cost.

Eastern industries that have seen income hopes dashed as "spring in February" cuts demand for cold weather goods and services include: coal, natural gas, and fuel oil, retail clothing

Garden

Garden, Mich.—Mrs. Alpha Thibault, Mrs. Orill LaBute, Mrs. Louis Farley and Mrs. James Rivers of Kate's Bay and Mrs. Harry Green served on the committee which arranged the public games party held at Marygrove Wednesday evening.

Mr. and Mrs. Charles Winter, daughter Marcella and son Virgil were visitors at the Harrison LaFolle home in Manistique Tuesday evening.

Mrs. Lucy Purtill, daughter Mildred and Mrs. Joe Farley visited Mrs. Walter Whitman of Manistique Tuesday.

Perry Pardee, son of Mr. and Mrs. John Pardee, returned from Marquette Wednesday.

Mr. and Mrs. Don Farley and Mrs. Jane Miller of Boyne City arrived here Thursday called by the death of Mr. Farley's nephew, Leslie Devet.

Soo Locks Repair Cold Winter Job

By EDWARD PRIZER

Sault Ste. Marie, Mich. (AP)—They're performing a huge cold weather dental operation this winter on the Sault canal, a life-line of American industry.

Engineers say it's unlike anything else in the world.

Workers literally are drilling and chiseling large areas from the walls of the canal's locks and filling the cavities with fresh concrete—about 1,500 tons of it.

The catch is that all this must be done in the four winter months. Navigation can't be interrupted for a minute once around-the-clock shipping starts in the spring.

For the canal's staff of 250, the operation is a constant battle against gales, ice and snow.

The canal is situated in northern Michigan on the St. Mary's river, connecting route between Lake Superior and Lake Huron.

Isabella

Birthday Party

Isabella, Mich.—Mrs. Don Duvouille entertained Thursday evening at her home complimentary to Mrs. Joseph Gouin, who was observing her birthday anniversary.

Three tables of cards were in play. Mrs. Arvid Sundin, jr., had high score, Mrs. Gay Gullickson, low, and Mrs. Albert Watchorn received the guest award.

Attending were Messedames Henry Turan, Caleb Johnson, Albert Watchorn, Gay Gullickson, Francis Nedeau, George Johnson, Harvey Sundin, Arvid Sundin, William Bonitas, James Nepper, Ray Nedeau and Leo Nedeau and Miss Olive McCleinchy.

Lunch was served, a birthday cake decorated with pink roses centering the pink and white appointments.

Afternoon Party

Mrs. Henry Legault was honored at a birthday party Wednesday afternoon at the home of her mother, Mrs. Arvid Sundin. Relatives and friends attended.

Lunch was served and Mrs. Legault was presented with a purse.

Birth

Mr. and Mrs. Ralph Bishop of Rochester, N. Y., are the parents of a daughter. Mrs. Bishop is the former Loretta Groleau of Isabella.

Personals

Mrs. Emma Peterson is visiting in Manistique at the home of her daughter, Mrs. Jack Leonard.

MOTORISTS PAY MOST TO ROADS

But All Are Dependent On Them

Washington.—It costs the average motorist about \$57.00 a year in automobile and gasoline taxes, the American Road Builders' Association was told here by Prof. Ben H. Petty, of Purdue University, LaFayette, Ind. Daily, this is cost of a package of cigarettes.

This assessment is primarily for road building and maintenance,

but the entire cost of roads should not necessarily be borne by motorists. Every community is dependent on highways and local streets. Few seem to realize, he said, that the food they eat, the clothing they wear, the fuel they burn, their house itself, all, at some time or other, either as raw material or in the processed state, were transported completely or partially over the highways.

The early attitude of opposition to providing money to build good roads is largely a thing of the past, he stated. The progress in developing highways has been bought with "good roads" campaigns, legislative battles, financial sacrifices, political fights and careful planning. In 1904, as au-

Belinda Dark Horse For Academy Award

By BOB THOMAS

Hollywood, (AP)—A guy named William Shakespeare holds the inside track for the 1948 academy awards. But a dark horse—"John Belinda"—bears watching.

Shakespeare's "Hamlet" won seven nominations in the list announced Thursday night—with Sir Lawrence Olivier getting a nod for both acting and directing.

However, "Belinda," perhaps Hollywood's best bet to thwart Britain's bid for honors, racked up less than 12 citations.

The nominations were marked by a pronounced British flavor and what shapes up as the hottest race in history for the best actress award. The hopefuls in the major race.

Best performance by an actress—Ingrid Bergman, "Joan of Arc;" Olivia De Havilland, "The Snake Pit;" Irene Dunne, "I Remember Mama;" Barbara Stanwick, "Sorry, Wrong Number;" and Jane Wyman, "Johnny Belinda."

Best performance by an actor—Lew Ayres, "Johnny Belinda;" Montgomery Clift, "The Search;" Dan Dailey, "When My Baby Smiles At Me;" Laurence Olivier, "Hamlet;" and Clifton Webb, "Sitting Pretty."

Best motion picture—"Hamlet," "Johnny Belinda," "The Red Shoes," "The Snake Pit," and "The Treasure of the Sierra Madre."

Besides "Hamlet," "Red Shoes" is a British contender, giving England probably its strongest hand in the annual Oscar derby. No British film has even taken

automobiles began to appear on the streets, there were 144 miles of paved roads in the United States outside city limits. By 1948, approximately 50 per cent of the roads were surfaced with one material or another.

"Picture of the Year" honors in the competition sponsored by the Academy of Motion Picture Arts and Sciences. Nominations came from 11,560 members of the film industry.

Olivier appears to be the cinch winner in the lead actor division. It was a slim year for dramatic male roles. Naming of Dailey and Webb proved unusual since comedy and musical roles are generally overlooked by the awards.

The feminine contenders for the gilt-edged Oscars—the little statuettes which go to the victors—shape up as the fastest field since the academy was founded in 1928.

All five actresses starred in bulky dramatic parts. Because of their unique roles, local guessing bestows favoritism on Miss Wyman as the deaf mute and Miss De Havilland as the asylum inmate.

Besides Olivier, Jean Simmons' Ophelia in "Hamlet" won a mention.

Note, Shakespeare was neglected in the nominations for writing.

Other nominations for the awards, which will be made March 24, include:

Best performance by a supporting actor—Charles Bickford, "Johnny Belinda;" Jose Ferrer, "Joan of Arc;" Oscar Homolka, "I Remember Mama;" Walter Huston, "Treasure of Sierra Madre;" and Cecil Kellaway, "The Luck of the Irish."

Best performance by a supporting actress—Barbara Bel Geddes and Ellen Corby, both in "I Remember Mama;" Agnes Moorehead in "Johnny Belinda;" Jean Simmons, "Hamlet;" and Claire Trevor, "Key Largo."

Best achievement in directing—Oliver in "Hamlet;" Jean Negulesco, "Johnny Belinda;" Fred Zinnemann, "The Search;" Trevor, "Key Largo."

Counting Vitamins At Cocktail Party Is Not Necessary

New York.—If you have been swallowing vitamin B pills or yeast with every cocktail in order to have a clear head the morning after the party, you can relax. So long as your diet is adequate, you need not worry about counting vitamins at cocktail parties.

This reassurance about vitamins and alcohol comes from Dr. Norman S. Moore of Cornell University School of Nutrition.

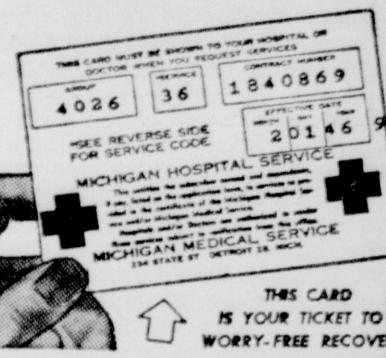

The idea that extra vitamin B is needed when alcohol is consumed is wrong and was based on a misunderstanding of scientific findings, Dr. Moore points out in his report to the New York State Journal of Medicine.

The mistake in thinking started in 1928 when it was first suggested that vitamin lack might be a factor in the development of the severe nerve disorder, polyneuritis, in alcohol addicts. Then it was found that alcoholics with this nerve disorder improved

while taking whiskey if they also ate a vitamin-rich diet and took extra vitamins.

Gold Medal Award

FASHION ACADEMY OF NEW YORK SELECTS

The '49 Ford

AS THE "FASHION CAR OF THE YEAR"

Citation "The 1949 Ford embodies all the essential qualities of good taste, modern design and subtle harmony in line and color. It is indeed a compliment to

the style-conscious woman who will recognize and appreciate the flattering background it provides for her best dressed appearance."

William Hartman
President, The Fashion Academy of New York

And looks are only half the story!

The Fashion Academy of New York has been noted for the past 20 years for its annual selection of "America's best dressed women." The '49 Ford was chosen to receive the Fashion Academy Gold Medal after 1949 automobile models of all makes and in all price classes had been carefully studied from the standpoint of excellence in design, simplicity and feminine style appeal. This recognition of Ford leadership in the modern trend of automobile design stands as a unique tribute to the work of Ford's Styling Department and of Design Consultant George Walker of Detroit.

J. W. Fergusons
Win Tournament,
Parsons Trophy

Mr. and Mrs. J. W. Ferguson won the Delta Bridge League's annual pair championship tournament after a very close and exciting contest held at the Elks Club. Their average percentage for the three sessions of play was .5820 and that of the runners-up — L. W. Olson and J. L. Temby — was .5813. The winners will hold the Parsons trophy for one year and were also awarded individual trophies for permanent possession.

At the outset of the final session Mr. and Mrs. Ferguson were in second place while Mr. Olson and Mr. Temby were in eighth place. The runners-up made a determined and spirited drive to overtake the leaders but failed by a hair's breadth to close the gap.

Pairs scoring 50 per cent or over in the final session were:

1. L. W. Olson and J. L. Temby .7000
2. Mr. and Mrs. J. W. Ferguson .6133

3. Mrs. J. C. Bennett and Mrs. D. L. MacLean .6035

4. Mrs. Fred Hoyler and Mrs. Joseph Shipman .5915

5. Mrs. B. M. Howe and Mrs. C. W. Murdock .5808

6. Mrs. E. A. Christie and Mrs. Rose Louis .5732

7. Mrs. R. E. Hodson and Mrs. L. P. Treiber .5581

8. Mrs. E. C. Beck and Mrs. Harry Needham .5083

9. Mrs. Nelson Jensen and Mrs. C. E. Johnson .5055

10-11 (tie) Mrs. E. Baker and Mrs. John Cass .5000

10-11 (tie) B. M. Howe and C. W. Murdock .5000

Leading Twelve

Standings of the twelve leading pairs at the close of the tournament were:

(N. B. The following figures denote the accumulated percentages for the three sessions of play)

1. Mr. and Mrs. J. W. Ferguson .7460

2. L. W. Olson and J. L. Temby .7439

3. Mrs. E. C. Beck and Mrs. Harry Needham .7047

4. Mrs. Fred Hoyler and Mrs. Joseph Shipman .6817

5. B. M. Howe and C. W. Murdock .5713

6. Mrs. W. O. LaFond and Mrs. Tom Shanahan .5456

7. Mrs. R. E. Hodson and L. P. Treiber .5418

8. D. R. Remington and Kirby Treiber .4961

9. Mrs. E. A. Christie and Mrs. Rose Louis .4898

10. Mrs. B. M. Howe and Mrs. C. W. Murdock .4895

11. Mrs. Joseph Richards and Mrs. Mary Buchholz .4356

12. Mrs. D. R. Remington and Mrs. Kirby Treiber .4243

InterCity Match Sunday

The semi-annual inter-city match with the Marinette-Minominee Bridge League will be held Sunday, February 20 at the Elks Club. Registrations will open at 1:30 and play will start promptly at 2:00 p. m. Pairs desiring to enter this match must make reservation by Thursday noon, February 17, with either Mrs. D. R. Remington, telephone 2014 or Mrs. Kirby Treiber, telephone 1469-R. Play will be followed by entertainment and a banquet. The last match was held in Marinette in May 1948 and was won by the Delta Bridge League.

The winning pair was Mrs. D. R. Remington and Mrs. J. L. Temby, who have been custodians of the Lauerman trophy since the date of the last match.

The luncheon and entertainment committee personnel includes Mesdames Kirby Treiber, chairman, E. C. Beck, C. G. Fries and Roger Moras.

The League will not meet next Saturday evening but regular play will be resumed on Friday, February 25.

If your husband's hat becomes rain-soaked, dry the felt carefully to restore its good looks. Push out dents and creases, level out brim and pull out the leather hat band. Leave the hat on a clean surface to dry away from artificial heat.

Personal News

Mrs. Gustaf Engdahl and Mr. Rudolph Erickson, Robert Engdahl and Miss Patsy Couillard, of Escanaba, will return tomorrow from a weekend visit in Milwaukee.

Mrs. Francis Flagstadt, 302 South 16th street, the former Marcella Beaumier, who is seriously ill, was taken by ambulance Sunday to the Mayo Clinic at Rochester, Minn.

Barbara McCormick, daughter of Mr. and Mrs. O. L. McCormick, and Mary Nicholas, daughter of Mr. and Mrs. E. John Nicholas, have resumed their studies at Northern Michigan College of Education, Marquette, after spending the mid-semester vacation at their homes here.

Mr. and Mrs. Louis Morin of Ford River left today for an extended visit in Hollywood, Fla., with their daughter, Mrs. Howard Carr.

Mrs. John Dini returned to Detroit today after spending three weeks here with Mr. and Mrs. Roy Goldberg.

Kenneth Carlson, who spent the weekend here with his mother Mrs. Anna Carlson, 217 South 23rd, returned today to Milwaukee where he is employed with the Allis Chalmers company.

Mr. and Mrs. James Gage returned to Detroit today following a visit here with Mr. and Mrs. E. M. Reynolds.

Miss Elen Mary Hendricks left today for Detroit, where she teaches school. Miss Hendricks was called here by the death of C. E. Bartley.

Richard Freeman returned to Milwaukee today, where he is employed, following a weekend visit here with his parents, Mr. and Mrs. A. W. Freeman.

Miss Ida Lange returned today to her home in Milwaukee. She was called here by the death of Victor Fazette.

Mr. and Mrs. John Lindquist of 208 North 10th street left today for Chicago to spend a week with friends.

Mrs. J. Ery Tans and Mrs. Francis Duchene returned to Waukesha, Wis., today after spending several days here with Mr. and Mrs. Carl Arntzen.

They aren't just friends to be made comfortable and welcome in an easy-going, relaxed sort of way. They are company who must be treated differently from the home in Chicago.

The house looks good enough for the family, but she always feels she has to apologize for it to the "company."

The children's everyday manners are good enough, but she keeps after them whenever there is company so they will be sure to make a good impression.

She's a good cook, but she is always afraid there is too much salt in the food, or that something else is cooked a little too long when she serves food to anyone outside the family.

Worries and Fusses

And so she worries and fusses trying to see that everything is just right for company. And then she wonders why her guests never seem to feel at ease.

If she could just treat those she entertains the way she treats for family—giving them the best she has and assuming that it will be good enough—she would be the kind of hostess she wants to be.

But guests are company, and she never forgets it, or never lets them forget it.

No wonder her guests find it hard to relax and enjoy themselves.

Field Workers To

Meet With Council

Miss Alice Lund, regional field adviser, and Miss Patti Follett, field worker of the Camp Fire Girls, will attend a meeting of the Bay de No Council Tuesday evening at 7:45 in the children's room of the Carnegie public library, to confer with local leaders on the program for the year. Miss Lund will remain in Escanaba for three days, assisting in organizing the program and Miss Follett will be here for a month. They will make their headquarters at the House of Ludington.

Fussy Woman Is

A Poor Hostess

By Ruth Millett

NEA Staff Writer

Guests never really relax in her house because no matter how well she knows them, the moment they walk through her front door they become "company."

They aren't just friends to be made comfortable and welcome in an easy-going, relaxed sort of way. They are company who must be treated differently from the home in Chicago.

The house looks good enough for the family, but she always feels she has to apologize for it to the "company."

The children's everyday manners are good enough, but she keeps after them whenever there is company so they will be sure to make a good impression.

She's a good cook, but she is always afraid there is too much salt in the food, or that something else is cooked a little too long when she serves food to anyone outside the family.

Worries and Fusses

And so she worries and fusses trying to see that everything is just right for company. And then she wonders why her guests never seem to feel at ease.

If she could just treat those she entertains the way she treats for family—giving them the best she has and assuming that it will be good enough—she would be the kind of hostess she wants to be.

But guests are company, and she never forgets it, or never lets them forget it.

No wonder her guests find it hard to relax and enjoy themselves.

Social Situations

SITUATION: You telephone a business associate at his home. His wife answers the telephone and asks if you care to leave a message.

WRONG WAY: Say, "This is Mr. Smith; will you ask him to call me when he comes in, please?"

RIGHT WAY: Say, "This is James Smith; will you have him call me at such-and-such a number, please?"

About 34,500,000 or 95 per cent of the housewives in United States today do home sewing. Fifty-two and one-half per cent are creative sewers who make clothing or household items; 54 per cent do mostly mending and darning.

Church Events

Fellowship Party

The Methodist Youth Fellowship of Central Methodist church will meet at the Masonic Temple at 8 this evening. The program will include a hymn by the assembly, a piano solo by Lorraine Erickson, reading by Lorrie LeDuc, vocal solo by Lorraine Erickson, and dialect reading by Miss Glad. Refreshments will be served. Linnia Magnuson is chairman.

* * *

First Birthday Party

Patsy Summers, daughter of Mr. and Mrs. Joe Summers, 233 North 20th street, who is one year old today, had a birthday party this afternoon at her home, attended by ten of the neighborhood children and her cousin Mildred Bellefeuille. Games were played and a birthday lunch served, a large cake centering the pink and blue decorations. Patsy received many pretty gifts.

* * *

Eagles Auxiliary

The Ladies' Auxiliary of the Eagles will meet in the clubrooms at 8 p. m., Wednesday for a social evening.

Mrs. Gladys Magnuson is chairman of the program and lunch committee and will be assisted by Mesdames Eileen Kjellgren, Myrtle Servant, Mary Ann Provencier and Edythe Olson.

* * *

Ladies' Aid Meeting

The Ladies' Aid of Evangelical Covenant church will hold their regular monthly social meeting in the church parlors at 2:30 p. m., Thursday.

Hostesses are Mrs. Carl Lambert and Mrs. Edith Anderson. A cordial invitation is extended to all members and friends.

* * *

Sleigh-Ride Held

For 4-H Groups

Twenty-five Pine Ridge 4-H boys and girls enjoyed an old fashioned sleigh ride party Sunday afternoon.

Clarence Sundquist and Andy Anderson took the group which included 4-H Sewing club girls and 4-H Garden club boys on the sleighride and after it they returned to the Sundquist home for games and a tasty supper.

Mrs. Sundquist was assisted by Mrs. Leonard Winling, sr., Mrs. Andy Anderson, Mrs. Louis Schaut and Mrs. Charles Sedenquist.

* * *

Valentine Party

St. Ann Social club is holding a Valentine party in Grenier hall on Friday night, Feb. 18.

Mrs. Hjelmer Peterson is chairman and will be assisted by Mesdames Ruth Snyder, Alebri Clouter, Melvin Carlson, John Dubord and Alton Crepeau.

* * *

Canton Ladies' Auxiliary

The Ladies' Auxiliary to Canton Hiawatha No. 48 will meet

Wednesday evening, February 16th at the home of Mrs. H. E. Plucker, 627 S. 15 St. A Valentine party will be held with an exchange of valentines and all members are asked to be present.

111 Cedar StreetROTES VISIT
PAPER MILLInspection Tour First
Of More To Follow

Manistique Rotarians enjoyed something different in the way of meetings today, being guests of the Manistique Pulp & Paper Company at a noon day luncheon followed by a tour of inspection of the plant.

The elaborate luncheon, served buffet style, was held at the company's new warehouse. The tour followed immediately afterward with guides appointed for groups of about eight to give the guests a comprehensive picture of it all.

Many of the guests, who had seen the plant on numerous occasions were in for a surprise for many changes have taken place in the recent past.

On the program committee were George Wood, Peter Babalidis, R. O. Smith and R. G. Hentschell. Guides operated under the direction of Frank Hobohlik and his general assistants.

This is the first of a number of tours of Manistique's industrial plants to be made by the Rotary club.

the skaters had to call it quits when the thin surface buckled and collapsed under a warm sun.

Marquette Rallies To Nip Indians In 6 To 4 Battle

Gladstone Is Nipped, 6-4, By Merchants

Gladstone, Feb. 14 (P) — Roy Olson, former Michigan Tech and Marquette Sentinel player, scored three goals and one assist to lead the Marquette Merchants to a sparkling 6-4 victory over Gladstone in a U. P. Hockey league contest here yesterday afternoon.

The Indians held a 1-0 lead after the first and a 3-2 lead after the second period, but a closing rush by the Merchants netted them the triumph.

Ed O'Leary opened the scoring on an assist by Wally Lake, and Gladstone took a 2-0 lead early in the second period when Johnny Lake scored from scrimmage.

Olson, whose brother Eddy is a St. Louis Flyer star, rapped in two goals to tie it up, with John Vasseau assisting both times, but Fritz Pepin slapped in Walter Lake's rebound to make it 3-2 going into the third period.

The Merchants had the edge in the finale. Olson scored again on Arne Ellsworth's pass to deadlock it at 3-all. Gordon Haga tallied on Art Legault's assist to put Gladstone into the lead again, 4-3, but the Merchants turned the heat on to tie it up and take the lead.

Gale Lawrence dented the net with Olson assisting. The last two Marquette scores were made while O'Leary was serving out a five-minute major penalty for fighting. Gale Lawrence and John Vasseau each beating goalie Aino Maki unassisted.

The Indians practice from 7 to 9 Tuesday and Thursday nights. They hope to book a game at Newberry Saturday night and then will play their final scheduled game at Sault Ste. Marie Saturday night, Feb. 26.

Newcomer Douglas Beats Fast Field To Win Texas Open

San Antonio, Tex., Feb. 14 (P) — Golf's touring crack shots moved on to Houston today with a comparative newcomer to their ranks — tall Dave Douglas of Wilmington, Del.—leading the way as winner of the \$10,000 Texas Open.

Douglas, playing his second year on the tournament trail, shot 22 under par for 72 holes to win \$2,000 first money with a total of 268. His final round was a blistering 65 over Brackenridge Park's 6,400-yard par 71 course yesterday. It edged Sammy Snead of White Sulphur Springs, W. Va., by a stroke. Snead wound up with a five-under par 66 and a 72-hole total of 269.

Lloyd Mangrum of Chicago, who didn't play here and who was the leading money-winner of the year until yesterday, will rejoin the tour at Houston after laying off a week.

Jimmie Demaret of Ojai, Calif., replaced Mangrum in the cash parade when he tied for fifth place in the Texas Open with E. J. Harrison of Little Rock, each with a 273. Demaret won \$650, making his total for the year \$5,862.50. Mangrum has bagged \$5,755. In third place is the injured Ben Hogan of Hershey, Pa., who had won \$3,823.33 before an auto accident two weeks ago temporarily took him out of golf.

Comins Takes Third In Petersen Classic

Chicago, Feb. 14 (P) — Daws Comins, of Kansas City, Mo., bowled his way into third place in the \$6,000 Petersen bowling meet early today with an eight game tally of 1,587.

Comins rolled games of 194, 191, 225, 183, 193, 179, 190 and 223.

Pete Carter, Detroit Classic League star, earlier moved into the sixth spot with 1,563. Another change in the leaders put Hilla Kallas of Milwaukee into a tie for tenth place with Detroit's Bill Bunetta, both with 1,554.

There was no change in the leaders in the \$36,000 De Vito tournament, running at the same time. Both meets end Feb. 20.

Classified Ads cost little but do a big job

DETROIT GIRL KEEPS NATIONAL PIN TITLE

Detroit, Feb. 14 (P) — Val Mikiel successfully defended her National Women's match-game bowling title last night by submerging a fellow Detroit, Connie Powers, by 741 pins.

Mrs. Mikiel led all through the 42-game match except the first game which Miss Powers won by seven pins. In the last seven games, Mrs. Mikiel averaged 210.8 to crush her challenger.

Her next match likely will be with Nina Van Camp, of Chicago, from whom Mrs. Mikiel won the title last spring.

Red Wings Maintain Margin With Rally Tying Bruins At 4-4

Boston, Mass., Feb. 14 (P) — Exploding with a three goal rally in the third period, the Detroit Red Wings last night gained a 4-4 tie with the Boston Bruins.

The Detroiters went into the third stanza on the short end of a 4-1 score, but two rapid-fire tallies by Bud Poile and Ted Lindsay enabled the Wings to pull up before the final horn.

Earlier in the period, the visitors had made it 4-2, on a searing 40-foot riser by Gordie Howe. The puck slipped right through the out-stretched hand of Frank Brimsek, Bruins goalie.

For the 19th consecutive time the married men on the Hawk squad triumphed over the bachelors, but it wasn't without a scare this time. The single men led 2-1 in the first period and 3-2 in the second, before the happily married men applied the pressure in the last canto to win by a 5-3 count.

The Hawk married men have never been beaten by the Hawk single men.

Escanaba 6's Tuesday Tilt Is Postponed

The Escanaba Hawk-Marquette Merchant game scheduled for the Marquette Palstra at 8:15 tomorrow night has been postponed indefinitely because of preparations being made there for the annual Marquette ice revue Wednesday night.

And by beating Munising tomorrow, the Trojans can post a 5-1 record—good for the second seeded spot in the lower bracket, which is just where Coach Tom St. Germain and his Trojans want to be. They don't care to meet Neogaunee until the finals, and then they would like to lower the boom on the Miners.

The Trojan-Mustang tilt at Bonifas tomorrow night is the next to the last scheduled home game. St. Joe will wind up the 1949-49 schedule by being host to Neogaunee St. Paul's Saturday night, Feb. 26. This figures to be another scorcher, incidentally. St. Paul's is the aggregation that recently swamped big little Mass. 88-59.

Escanaba's next game will be against the South Marquette Athletic club, early pacers in the league, here next Sunday night. This game will be broadcast by WDBM, Escanaba radio station.

Although they have played no league contests since Feb. 2, the Hawks have not been idle. They drilled twice last week and last night held their annual married men-bachelor game at the indoor rink.

For the 19th consecutive time the married men on the Hawk squad triumphed over the bachelors, but it wasn't without a scare this time. The single men led 2-1 in the first period and 3-2 in the second, before the happily married men applied the pressure in the last canto to win by a 5-3 count.

The Hawk married men have never been beaten by the Hawk single men.

ATOM WASTES ARE STUDIED

Bacteria May Be Used For Disposal

Washington—Bacteria, germs to the layman, may in future be used to take care of dangerous, radioactive liquid wastes from atomic energy plants, piles and the like.

Use of them for this purpose would provide safe disposal of these wastes at less cost than chemical methods, Dr. C. C. Ruchhoff of the U. S. Public Health Service's Environmental Health Center at Cincinnati, Ohio, told an Atomic Energy Commission meeting here.

The bacteria would be used much as they are now to purify wastes in modern sewage disposal plants.

Experiments at Los Alamos, Dr. Ruchhoff reported, suggest that a two-stage activated sludge process can be expected to remove 99 percent of plutonium from waste. The fluid remaining should then approach the tolerance, or safe, limit of plutonium that can be discharged into a stream.

The activated sludge is made up of massive colonies of bacteria embedded in a jelly-like substance. When the bacteria swell through absorbing water they present an enormous surface area that can hold radioactive materials.

Questions still to be answered are: 1. Will the bacteria absorb and concentrate other types of radioactive material besides plutonium and uranium? (The Los Alamos experiments showed the bacteria took up uranium as well as plutonium.) 2. What can be used to feed the bacteria in the sludge? Normally they feed on organic sewage material being treated. But in many areas were radioactive wastes are found, adequate sewage is not available.

Studies to bring the answers are now under way at Oak Ridge, Los Alamos and Cincinnati.

Until 1890 all indigo, one of the most important dyes, was obtained from plants. At that time a synthetic was manufactured.

Better Nutrition Would Make America Stronger

By GAYNOR MADDOX
NEA Food and Markets Editor

New York, (NEA)—We can eat ourselves into a physically strong nation.

And good eating can lessen human frailty.

Their study followed these basic steps:

1. They gave each of the 239 individuals a medical, dental and nutrition test. This physical check-up was repeated in six months and again at the end of the year.

2. They planned master menus for each family, based primarily on the physical and nutritional needs of the individuals in it. As far as consistent with good nutrition, the menus were based on the family's general eating preference or traditional eating habits.

3. They then sent in a corps of experts to show not only how to cook the food but also how to buy and store it.

Initial checkups showed that the families under study were getting too little food, poorly chosen, cooked by haphazard methods that destroy much of its nutritional value.

The use of sea foods, of variety meats such as liver—particularly—and kidneys, and of dark bread had been stepped up. The use of milk and cheese had been increased 24 per cent, the use of green and yellow vegetables 24 per cent, of potatoes nine per cent, of fruits and other vegetables, nine per cent, of cereals

and related products 21 per cent, and of fats 30 per cent. Cooking methods were improved.

Before the experimental period ended the subjects discovered, first, that they liked foods they thought they didn't; and, second, that they enjoyed eating more—as doctors know, appetite increases with the habit of eating.

At the end of a year, the final check-up showed a marked decrease in irritability and fatigue, as well as generally improved body tone.

Explains Dr. Mack: "They were better human critters."

But they did not rate very high as human critters at the beginning.

Dr. Mack, who thinks like a scientist but talks like a down-to-earth farmer, says:

"Here we had a group, all selected because they were apparently in good health. They came from skilled-labor, business, semi-professional groups—pace-makers among American families. But their eating habits were lousy."

The physical condition of this 'pacemaker' group leads to the conclusion, she adds, that the failure of the public to live up to a

few simple rules of good eating is spoiling our national strength.

"Our initial check-up revealed heart tensions, fatigue, gingivitis and many other borderline conditions due to related to bad nutrition," she adds. "There were lots of poor reflexes—meaning too many skittish auto drivers. There was deficient dark accommodation. If a man goes into a darkened movie theatre and sits on someone's hat or the lap of another man's wife, that's deficient dark accommodations due to eating the wrong way."

Adult females made the worst showing at the beginning, teen-

age girls about as bad. The men and teen-age boys of the family did better. Children under 12 came out best.

Of the sixty-four families selected, that of Dr. J. Fred Osterling of Philadelphia showed the highest over-all rating at the end of the year. Osterling is a chemical engineer, with a wife and three children. Here are Mrs. Osterling's observations as told to NEA Service:

"It was a revelation to us all. I had grown up in a 'meat and potato family,' so I had a lot to learn about nutritionally balanced diets. I used to worry about those

blue lines across the bridge of the nose and under the eyes of my children. Now they are gone because I feed them better. We all feel fitter, look better and seem happier. Do you wonder I want to tell the world?"

COON MODEL AWOL

Ann Arbor (AP)—Mr. and Mrs. John George are looking for their pet raccoon. The couple, studying zoology at the University of Michigan, explain they have been writing stories about animals. Just as they finished the story about a raccoon, the animal went AWOL before they could paint his picture for the story illustration.

New Scholarship
Plan Introduced
At Michigan State

East Lansing, (AP)—Approximately 750 scholarships for Michigan high school and junior college students will be made available through a new scholarship plan at Michigan State college.

The program, approved by the State Board of Agriculture Thursday will go into effect for the 1949-50 school year.

The scholarships will cover total course fees at the college and will apply for four years if the student maintains a good scholastic average. Basic requirements will be scholastic average, need and participation in extra curricular activity. Generally, any student in the top third of his class will be eligible.

Sports will be considered an extra curricular activity, Arthur J. Clark, chairman of the scholarship committee said, but so will music, public speaking and other outside interests. He said a similar plan is in effect at the University of Michigan.

Other college spokesman said the plan was not primarily aimed at athletes.

Main purpose of the plan, he said, is to provide a higher education for students who would not otherwise get to college.

Of the scholarships, 625 will be earmarked for high school seniors and the rest will be handed out generally.

Michigan State recently dropped its Jenison scholarships for athletes to conform to Big Nine regulations.

DUCK HITS ENGINE
Manistee—(AP)—Crewmen of a southbound Chesapeake & Ohio train thought somebody had taken a shot at them in the darkness when a window in their engine cab was shattered near Kavala. They notified state police who found, not a rifleman, but a dead duck along the right of way which apparently had flown against the locomotive.

GOVERNOR AT CAPITOL—Gov. G. Men-
non Williams (center) of Michigan poses with
Sen. Homer E. Ferguson (R-Mich) (left) and
Rep. Charles E. Potter (R-Mich) in Washington

at a capitol luncheon arranged by Potter. Williams came to Washington to urge that the state be permitted to retain Fort Brady at Sault Ste. Marie. (AP Photo)

**Tough False Teeth
Of Wabash Fireman
Found in Coal-Pits**

Decatur, Ill., (AP)—Sam Bridge is glad he's recovered his false teeth, because they're plenty tough.

Bridge, a Wabash railroad fireman, lost his choppers about three months ago while riding locomotive No. 2719 around Illinois or Niantic, west of here. A few days ago a machinist at the roundhouse, working on the locomotive, found them at the bottom of the pits through which the locomotive stoker boosts coal from the tender to the firebox.

**Moscow Stakes Out
Claim To Antarctic**

**Polar Area Discoveries
Claimed By Soviets**

By EDDY GILMORE

Moscow, U. S. S. R. (AP)—Russia has staked out a claim to participation in any international discussion over the vast Antarctic.

The official Soviet news agency Tass said in a statement that "Russian scientific investigations have priority in discovery and investigation of the Antarctic."

Therefore, the statement added, "our homeland has the unquestionable right to participate in the decision of questions connected with the Antarctic."

A decision on administration of

the vast South Polar area "without participation of the Soviet Union cannot have legal basis," Tass declared.

The state department last September proposed that an international control of the rich area be set up. The proposal was addressed to seven other nations claiming parts of the Antarctic: Britain, Chile, Argentina, France, Norway, New Zealand and Australia. The state department proposal was, however, rejected by several of the nations, among them Argentina, Chile and Norway. The American proposal was aimed at settling clashing claims and at arriving at some decision for division of the great natural resources of the Antarctic.

Danish Farmers Change From Horse To Tractor

Copenhagen, Denmark, (NEA) — Young Clemens Jensen finally sold old Hans Sorensen on a new-fangled idea. The result: Horses are disappearing from Danish farms and Denmark's food production is soaring.

It's just one typical example of what the Marshall Plan is doing in Europe.

Jensen is a young farmer on the island of Zealand, just north of Copenhagen. He heard about an idea that was working successfully in Sweden, a farm machinery pool, and decided to try to set one up in his country. He went to the Economic Cooperation Administration representative from the U. S. with a story something like this:

"You want us to increase our food production. We can't because we don't have enough farm machinery. And most of the farmers can't afford to buy expensive tractors and the like because their farms are too small to support such a big investment. Will you help me set up a farm machinery rental agency that will furnish equipment to all of the farmers, big and small, at low rates?"

He stated it as simply as that. The ECA's answer was an en-

Hans Sorensen and tractor: He gave in, the horses went out.

ish farmers. Hans Sorensen, 75, of Breining, had two and one-half acres and was one of the most conservative of all. Jensen tackled him first.

After considerable persuasion, Sorensen decided to give the thing a try. To his amazement he discovered that he could get all of his ploughing done with rented equipment in two hours. His cost: \$12.

That night he sat down at his dining room table and figured out that it cost him \$5 a day the year round to keep a team of horses; when he used them for ploughing, it took four days to do the job.

Next day Hans frankly admitted:

"I was a stablehand most of my youth and came to love horses. If I could afford it, I would keep a horse—just to have him in the stable and be able to talk with him once in a while. But I wouldn't use him in the field anymore. The tractor has out-classed him."

After selling Sorensen and the other older farmers, Jensen's plan found swift success. The idea is now working all over Denmark with more than 300 machinery

centers in a country boasting less than 11,000,000 acres. And more than equipment is on its way from America to expand the program.

Danish farmers today have available to them 450 tractors and 2000 pieces of other equipment including harvesting machines, haycutters and thrashers. Each center serves farmers within a radius of about 35 miles. The rental is the same for all: \$3 to \$3.50 an hour for a 30 to 40 horsepower tractor. That price includes the driver. Continuous use of all equipment by a large group of farmers keeps operating costs down and fees low.

DETROIT HONORS LINCOLN

Detroit, (P)—Detroit's only outdoor statue of Abraham Lincoln will be the focus Saturday of ceremonies marking the 140th anniversary of the great emancipator. Two hundred Boy Scouts, Girl Scouts, Cubs, Brownies, police officers and officials of the Lincoln-Mercury Division of the Ford Motor company will gather in front of the statue at the Lincoln plant for the event.

Crooner Mel Torme Out Of Circulation

Starlet Candy Toxton Weds Sigh Singer

By BETTY PROSSER

Chicago, Illinois (P)—Florence Gertrude Tockstein got married Friday—and that's sad news to thousands of bobby soxers.

For when Florence—a Hollywood starlet also known variously as Candy Toxton, Brooke Chase, Linda Howard, and Susan Perry—weds, it will take sighted Mel Torme right out of circulation.

Mel, 23, also has other names, including that of "The Velvet Fog," he sings.

The slight crooner and his bride-to-be received newsmen Thursday, interspersing the interview with whispers, kisses, playful swats and what each plainly considered hypothetical questions addressed to the reporters, to wit:

"Isn't he (she) wonderful?"

The wedding at the fashionable Ambassador East hotel was small and strictly private. Only the immediate families plus two show business friends, Woody Herman and Nat "King" Cole will attend. After a one-day honeymoon the couple must go to New York where Mel has a theater engagement.

"We want to get married with as little bother as possible," Mel said. "We don't want to bend over backwards to be unhappily-woodish, but you only get married once—at least we do."

Mel and Candy's idea of a good time is midget auto races, a record session at his house or the movies. They see about five a week presumably they'll see Candy in her first and only big movie role, that of Humphrey Bogart's wife in "Knock on Any Door."

POLES MUST REGISTER

Warsaw Poland (P)—All men aged 23 to 49 were ordered to register for the army reserve Friday by Poland's ministry of national defense.

FAKE WAMPUM HURT INDIANS

Dutch Traders Created Imitations

Ann Arbor—One of the earliest currency devaluations in America was that of the Indian wampum, when Dutch traders in the 17th century ruined the value of this Indian medium of exchange with their imitations of it.

An exhibit of Indian beads and wampum and of Indian pipes in the University of Michigan Museums reveals that "counterfeit wampum" began to appear after beads became the "money" with which the whites obtained furs, tobacco, food, and other commodities.

The Indians made their beads out of the shells of clams and snails, and strung them or embroidered them into caps, belts and sashes, Irving G. Reimann, prefect of University exhibits, has explained. Known as wampum, these beaded articles were used for personal adornment and also had a variety of symbolic meanings. It was not until the white settlers began to trade with the Indians that the beads became an equivalent of money.

European beads of glass and porcelain which had the same shape and color as the shell beads soon flooded the east coast and eventually found their way inland. As they multiplied in number, the value of the genuine wampum dropped. In 1650, Reimann adds, the Council of New Netherland outlawed this kind of counterfeiting, establish standards for genuine wampum, and penalties for its imitation.

The University exhibit is made up of wampum and pipes discovered in ancient Indian burial grounds, many of them of prehistoric periods. Some of them were in Emmet and Lenawee counties of Michigan. They indicate that smoking was a ceremonial ritual with the Indians many hundreds of years before the white settlers came. However, smoking was confined entirely to

Acid From Sweat Relieves Psoriasis

Chicago—Patients with psoriasis and another stubborn itchy skin disease, neurodermatitis, may get some help from pills containing a fatty acid found in sweat.

"Definite improvement in the psoriasis" in 17 patients and "improvement or disappearance of the lesions and itching" in eight patients with neurodermatitis following treatment with the new remedy are reported by Dr. Henry Harris Perlman of Philadelphia in the forthcoming issue of the Journal of the American Medical Association here.

Calling the new medicine "an interesting approach to the control" of these two diseases, the editor of the A. M. A. Journal warns, however, that the method "is still in the stage of experimental investigation and must be so regarded until further evidence is accumulated. Under no circumstances should it be accepted at this time as the most effective and only treatment."

The Indians made their beads out of the shells of clams and snails, and strung them or embroidered them into caps, belts and sashes, Irving G. Reimann, prefect of University exhibits, has explained. Known as wampum, these beaded articles were used for personal adornment and also had a variety of symbolic meanings. It was not until the white settlers began to trade with the Indians that the beads became an equivalent of money.

European beads of glass and porcelain which had the same shape and color as the shell beads soon flooded the east coast and eventually found their way inland. As they multiplied in number, the value of the genuine wampum dropped. In 1650, Reimann adds, the Council of New Netherland outlawed this kind of counterfeiting, establish standards for genuine wampum, and penalties for its imitation.

The University exhibit is made up of wampum and pipes discovered in ancient Indian burial grounds, many of them of prehistoric periods. Some of them were in Emmet and Lenawee counties of Michigan. They indicate that smoking was a ceremonial ritual with the Indians many hundreds of years before the white settlers came. However, smoking was confined entirely to

FHA AVORS INSULATION

Unqualified approval of complete house insulation was given recently by Thomas G. Grace, New York State director of the Federal Housing Administration, who said that he would like to see full insulation on every property on which it insures the mortgage.

HYBRID CORN TO AID ITALY

Plantings Are Made In Po Valley

Washington, (SS) — Hybrid corn from America bids fair to solve a considerable part of Italy's food problem, states Dr. Robert M. Salter of the U. S. Department of Agriculture. Plantings made during the past two seasons in the Po valley, Italy's corn belt, have in some instances boosted the per-acre yield as much as 50 per cent, instead of the 20 to 25 per cent increase obtained in this country. Even a consistent gain of 20 per cent would be a tremendous thing for Europe.

In climate and soil conditions, the Po valley most nearly resembles central Indiana, near the southeastern edge of what is usually considered the great American corn belt. Corn is a mainstay in the diet of the inhabitants of that part of Italy; they eat polenta (cornmeal mush) in preference to the macaroni and spaghetti favored in other parts of the peninsula.

Europe's other great corn-raising area is in the Danube valley, notably in Hungary, Rumania and part of Yugoslavia. Here conditions resemble those of Iowa and northern Illinois, the heart of the American corn belt. Livestock raising is an important industry in these countries, so that a big boost in the per-acre corn yield, made possible by planting hybrid varieties, would

Pea Processing Savings Made

Pullman, Wash.—A process first used to concentrate ores in the mining industry is saving \$600,000

much in their national economies.

Corn came early to the Danubian lands. Within 50 years after the discovery of America, it was being grown in the region, under the curious misnomer, "the Turkish grain."

a year in the processing of peas. The process is froth flotation in which floating is used to separate materials. Cracked peas, pea skins, nightshade berries and tare seeds are now floated out of batches of peas in the way that foreign material is floated out of ore.

Developed at the U. S. Department of Agriculture's Bureau of Agricultural and Industrial Chemistry laboratory here, the froth flotation process is expected to save an estimated \$2,000,000 yearly in the future in the cost of processing peas for canning or freezing.

WILDLIFE HIT BY BLIZZARDS

Wild Geese And Ducks Likely To Perish

Washington, SS)—The blizzards that threaten disaster to the Western livestock industry have been inflicting heavy losses on wildlife as well, reports to the U. S. Fish and Wildlife Service indicate. Although field reports are still far from complete, it seems certain that vast numbers of wild geese and ducks that normally winter along the streams of the northern Rockies and Cascades have perished. Strenuous efforts, by both air and ground means, have made some grain available to the birds, but only a few of the distress spots could be reached.

Deer and elk in the Jackson Hole area are being fed hay from a 4,000-ton reserve, and state game authorities are distributing feed to smaller elk herds elsewhere. The northern Yellowstone Park herd has drifted down the valley out of the park, and thus far no reports of trouble to this big-game concentration have been received by the National Park Service here. Since bulletins come in daily, it is assumed that in this case no news means good news.

Neither of the two Services has had reports of the condition of the antelope herds. However, since the larger concentrations of antelope are south of the region of heaviest snow, there is reason to hope that they are little affected.

Hollywood Column

By BOB THOMAS

Hollywood, (AP)—Chances are, you are not one of the million or so who own television sets.

Chances are also, you and your family will be deciding in the next year or two or three whether or not to shell out \$99.50 to \$1,500 to buy a set. So you may be interested in hearing the views of people who now have video in their homes.

To get this information, I posed as a television repair man for a day. Although I don't know my iconoscope from a modulation, I carried the tool box of RCA repairman Bob Boneisler during his calls at West Los Angeles homes. By the end of the day, I got to be fairly adept at putting on the knobs.

The poll is not meant to be a scientific one, but I think it does show a representative cross-section of video viewers. Here are the questions and answers:

1. Do you like television?

Generally, the answer was yes. Several said, "I don't know what

we did without it." One woman declared it was Godsend to her husband, a semi-invalid — "It made his life worth living."

On the debit side, a grandmother said she didn't look at it much unless there were younger folks around. A businessman didn't care for it particularly, except for sports.

2. What don't you like about television?

One old lady said there was too much sports. A writer complained about lack of rehearsal and poor lighting. A student said too much emphasis was on entertainment, with none on thought-provoking features.

Other complaints: Lack of good small screen. One woman groused that TV ruins conversation.

3. Do you listen to the radio less often?

Nearly all said yes. One couple listens only to news commentators, which programs are generally lacking on video. A housewife said she listens all day, but never after dinner when the TV shows come on. A few said they never turn on the radio at all.

The grandmother, however, said she couldn't shake the radio habit and had to listen to her

favorite shows.

4. Do you go to the movies less often?

One woman said she hadn't seen a movie in a year and a half. How long had she owned a TV set? "A year and a half." This was typical of the answers. All reported they went to the movies less than before, although three younger couples said they still attended once a week.

5. How has television changed your way of life?

The businessman reported it had increased his liquor bill, since more people drop in. Another complained it "has made a theater out of my home," for kids from all over the neighborhood.

One mother said she has trouble getting her 14-year-old son to bed. A farther said TV was great for discipline: If the kid didn't do his homework, no Hopalong Cassidy.

Nearly all answered they stay home much more and have more friends in than before. One woman declared TV finally made her husband contented.

"He used to go to sleep in the living room right after dinner," she said. "Now he stays awake until the television shows are over."

Memorial Highway Proposed On US-2

Lansing, Mich., (AP)—A bill was introduced in the House Friday to establish a Spanish-American War Veterans' Memorial highway across the Upper Peninsula.

Introduced by Rep. Richard H. Deadman (R-Alpena), the bill would designate US-2 from Sault Ste. Marie to Iron Mountain, JM-69 from Iron Mountain to Crystal Falls and US-2 from Crystal Falls to Ironwood as the Memorial highway.

The highway department would be required to place memorial markers along the route.

RECKLESS FILER FINED

Manistee (AP)—Bert B. Morris, 23, of North Liberty, Ind., paid a \$50 fine and costs in justice court here Thursday on a reckless flying charge.

State police accused him of setting his plane down on highway M-55 and taxiing to a roadside parking spot when he could not find a clearing on some land he had come here to inspect.

U. S. Farmers Receive Dividend From A-Bomb

Important tool of the atomic farmer is the Geiger counter, here being used by a scientist to determine if the radioactive fertilizer has been properly covered by soil.

By DOUGLAS LARSEN
Parker, Department of Agriculture scientist:

Washington, (NEA) — American farmers are getting their first dividend from the atomic bomb in the laboratories of the U. S. Department of Agriculture.

And science is one step closer to one of the greatest unsolved mysteries of all times—how some plants can take elements from the soil and turn them into food for man.

Radically new methods of using fertilizer is the first practical result of agricultural research with isotopes, a by-product of A-bomb manufacturing.

Common phosphorus, made into a radioactive isotope, is the research tool which has been used for tracing the effects of fertilizer on crops. The tracer technique is best described by F. W.

Some of these questions can now be answered exactly and the scientists are on the right track for answering all of them. Here are a few of the answers:

Most efficient use of a fertilizer varies in all aspects according to crop and soil. Potatoes use fertilizer added any time during the growing season. Corn uses very little fertilizer added to the ground after the first stages of growing.

It is obvious what this information means to the farmer. For corn he must keep his soil built up all of the time. For potatoes, to get an increased yield, he must apply it in concentrated doses. Farmers in some parts of the country have been doing just the opposite of this.

Phosphorus added to soil already containing a certain amount of phosphorus doesn't increase the yield of corn. This applies in a lesser degree to all other plants. For the first time it is proved that there is a pretty low point of diminishing returns on the use of phosphorus.

In the matter of placement, phosphorus placed in contact with the potato seed contributed much less to its growth than placing it in a two-inch band next to the row of seeds. The opposite is true for cotton.

Scientists working on the project will discuss only a few of their preliminary findings, only enough to show the tremendous significance of this work. It is hinted, however, that the farmer may get some detailed instruction on the use of fertilizer this year on the basis of this study. Some general reports, such as the following, have already been released:

"We have found that rye grass grown on a particular soil type gets most of its phosphates from the soil, even though phosphate fertilizer is added. It is obviously a mistake to make heavy applications of phosphates on land that is able to supply most of the needs of a crop from its own reserves. It is equally uneconomic to withhold phosphates from soil that is able to supply only a fourth or a third of what a crop needs."

One of the most interesting results of the tracer study has come from a two-year project on pecan trees. It was discovered that when fertilizer was placed on only one side of the tree, just the nuts on that side of the tree benefited a year later. This single fact is im-

portant to farmers in the highly competitive pecan growing business. It means that care has to be taken to spread fertilizer all around each tree.

Phosphorus has proved to be an excellent material for this work because of the long time it remains radioactive after being made into isotope form. Extreme care must be used in its handling, but once it is put into the ground it is no longer very dangerous.

Geiger counters, which detect radioactivity, and sensitive electroscopes are used to detect and measure the amounts of radioactive fertilizer being absorbed by plants at various stages of growth. Sometimes tiny particles of the plant are cut off and sometimes the Geiger counter is used in the field.

The immediate fruits of this work will be the saving of millions of dollars by farmers and the production of better crops. It will mean lower food prices.

Long-range possibilities of further research of farming methods with the isotope tool are almost limitless. If it eventually unlocks nature's secret of how food is produced from the ground, as scientists are hopeful that it will, starvation will become a thing of the past in this world.

Holland Tulip Fete Getting Too Large

Holland, Mich., (P)—Perhaps the annual tulip festival has grown too large. Some residents seem to think so.

To find out exactly how everybody feels about it, the Chamber of Commerce is going to conduct a poll by mail.

The question: Should the colorful festival be continued as an

event attracting several hundred thousand visitors each year; or should it be held on a small scale, with a minimum of expense and effort, for the enjoyment of local residents only?

Dates for this year's festival, planned with the customary four entertainment-packed days, will be May 18-21.

CATTLE FEED IS PRODUCED

Molasses Will Be Made From Wood Waste

Wilson Dam, Ala., (SS)—Wood molasses, in a 20,000-gallon-per year volume, will soon be in production here under a project in which the U. S. Forest Products Laboratory of Madison, Wis., is cooperating with the Tennessee Valley Authority. The raw material will be wood wastes from forestry and sawmill operations, and cull trees removed to permit better forestry growths.

Forest Products Laboratory already has a wood molasses pilot plant in operation in Wisconsin. This will be a second pilot plant, both producing a product pri-

marily for cattle feed, to determine the best methods of extraction and the best methods of using the output for livestock feeding and other purposes.

There are plenty of young trees that should be removed in the Tennessee Valley, and plenty of logging residues and unavoidable wastes of woodworking plants. Former wastes may become an important source of primary income to farmers and foresters with the establishment of mills to

use them. The Wisconsin plant has already proved that livestock molasses can be produced economically, half sugar and half water. For use as cattle feed, the sugar solution usually needs to be neutralized to dispose of the acid.

Wood molasses, also called wood-sugar molasses, is produced by converting the wood's cellulose and hemicellulose to sugars by treatment with hot dilute acid in a digester, or hydrolyzer. This produces a weak solution of su-

gar in water. Evaporation removes most of the water until the solution is of molasses consistency, half sugar and half water. For use as cattle feed, the sugar solution usually needs to be neutralized to dispose of the acid.

In the plant here, it is proposed to produce partially hydrolyzed products in the digester, which will give a lower yield of sugar but leave a residue that can be made into hardboard and similar materials. This promises a fuller

use of the wood wastes, and a greater income. Southern hardwoods are to be used in the process.

A new process to crack rock thousands of feet under ground to permit the flow of oil to the wellholes from which it is pumped to the surface utilizes jellied gasoline, one of the war's most horrible incendiary weapons.

Buy and Sell the Classified Way

Raleigh Man Digs Grave, Kills Man, Elopes With Wife

White, was contained in a confession signed by Jack Bridges.

The sheriff related: Bridges had become infatuated with Keston Norris Privette's wife.

He dug the grave last Saturday on the rear of Privette's property near here. He took Privette, a 22-year-old mechanic, to the spot on Monday and killed him. Then he took Mrs. Privette and her two small children.

That story, said Sheriff A. E.
